Work Experience

SE, Full-Stack - Critical Techworks, BMW Joint Venture.

Development of an internal web-based platform used to standardize heterogeneous vehicle sales data originating from external partners. The portal includes data mapping and normalization logic for car attributes, enabling consistent cross-brand and cross-market analysis. Once standardized, the data supports sales forecasting and actual sales comparison with competitor sales. The platform also offers configuration of system entities, such as markets, countries and partner dealer groups.

2024 - Present

Tech stack: Angular, RxJS, Nest, AWS (S3, Lambdas, Glue Jobs), PostgreSQL, Terraform

Azure PaaS Support Engineer - Microsoft

B2B support resolving issues that occur in the Azure Resource Manager layer of Azure.

2022 - 2024

Tech stack: Terraform, Azure Resource Management Layer

Software Engineer, Front-End - Hitachi Solutions Europe, Ltd.

Development of a Word Add-In used to automate the insertion of sprint progress information into standardized deliverable documents.

Maintenance of the company's internal website. The platform is used to display relevant information within the business, as well as a support center to raise issues to relevant departments.

2019 - 2022

Development of Content Management System within the internal company portal to enable upper management to manage resources and internal tickets.

Development of form-building extension sold by the company as an add-on to CRM projects. Features I worked on include form hooks that enable the execution of custom logic, and expansion of the display rules engine for the form fields.

Tech stack: Vue-Typescript, Node, Azure (Storage, Functions)

Education

MSc Electrical and Computer Engineering - FEUP

Field of Telecommunications, Electronics and Computers

Specialized in Multimedia and Communications

2022

Projects

🔗 **Impare** - Automated data migration from the previous version of the website to the current one and fixed styling issues. *JavaScript, HTML, React.*

2024 - 2025

🔗 **Career Portfolio** - Created a static web page detailing information about me, contacts and experience. *HuGo/HuGo themes, HTML, CSS, GitHub Pages, GitHub Actions*

2018 - Present

🔗 **An Analysis of Performance Recipes with C Applications (Master's Dissertation)** - Profiled performance hotspots in High-Performance and Embedded systems, and refactored code to improve execution times, energy consumption and cache utilisation. *C, GPROF, Linux Shell, LARA: JavaScript Based Language*

2020 - 2021

🔗 **YouTube Accelerator** - Built Google Chrome extension that adds a component to the video that changes the playback rate of YouTube videos. Usable via both UI and Keyboard interface. *HTML, CSS, JavaScript, Google Extension API*

2022 - 2024

Technical Skills

Programming: JavaScript, TypeScript, SQL, Python, C#, Java

Web: Nest.js, Node.js, Angular, React, Vue.js, HTML/CSS

Databases: PostgreSQL, S3, Google Firestore, Azure Storage

DevOps: Terraform, GitHub Actions

Languages: Portuguese (native), English (fluent)
